

Arsenic Removal

Arsenic removal media is a hybrid ion exchange resin specifically designed for removal of arsenic from water.

Arsenic can affect the human body with symptoms such as thickening and discoloration of the skin, stomach pain, nausea, vomiting, diarrhea, numbness in hands and feet, partial paralysis, and blindness.

Iron Removal

Black catalytic media used for removing soluble iron from water supplies. The nodular shape and the controlled grading of the granular media, together with its ruggedness and durability provides for excellent filtration efficiency, even after years of continuous service.

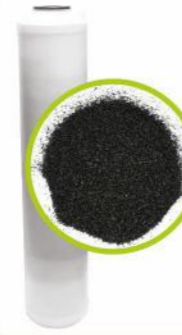

Iron in the water leads to red staining in appliances, clothing and toilet bowls.

Magnesium Removal

Magnesium removal media used for pre-treatment of raw water to prevent scaling and inorganic polluting.

Hard water when comes in contact with metals causes corrosion, which results in turning the tap water brown and even causing leakage and the pipe burst.

Chlorine Removal

Very high IV valued activated Carbon removes chlorine, taste, odor and organic compounds to deliver clean, filtered water to every outlet in your home.

The common problems associated with chlorine in the water is that it leaves an unpleasant taste and smell behind. Chlorine can alter the taste of water, coffee, tea and other beverages.

Fluoride Removal

Fluoride removal media used for effective removal of fluoride ions during the service cycle and efficient reversibility and clean-up of the resin during regeneration to give the predictable and consistent performance and low leakage over time.

Higher levels of fluoride can weaken bones and ligaments and cause nervous system problems and dental fluorosis.

Ultra Filtration

Remove higher levels of turbidity, large amount of sludge, red worms, sediment and colloid and other impurities in the water.

- Unique design
- can be wall mounted
- doesn't require electricity
- Food grade SS 304 casing

Wide Range of Filtration System

Every House needs

Whole House Water Filtration System

Do you trust your inlet water?

Every day we used lots of Water
While Bathing, Brushing, Cleaning etc.,
Direct through Tap or Shower

Do you know the quality of Water ?

Its contain sediments, rust and other particulate matter.
its harms or affect your appliances, health, skin, hair etc.,

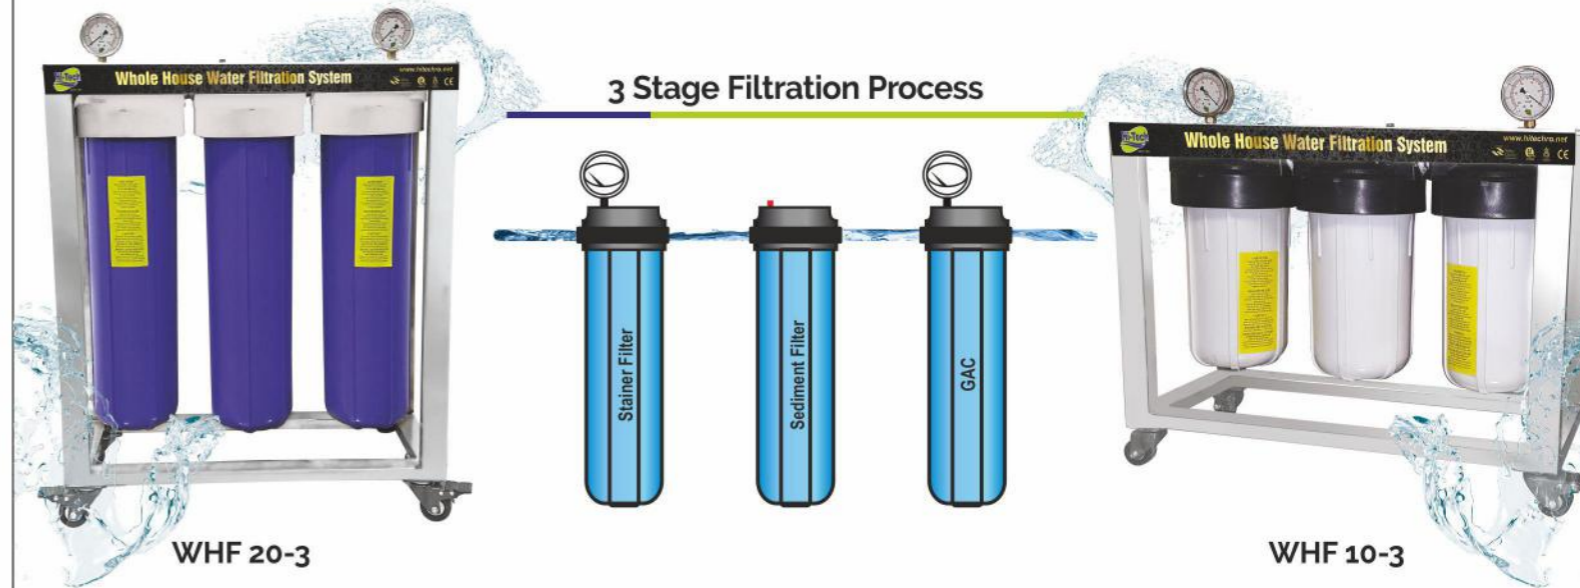

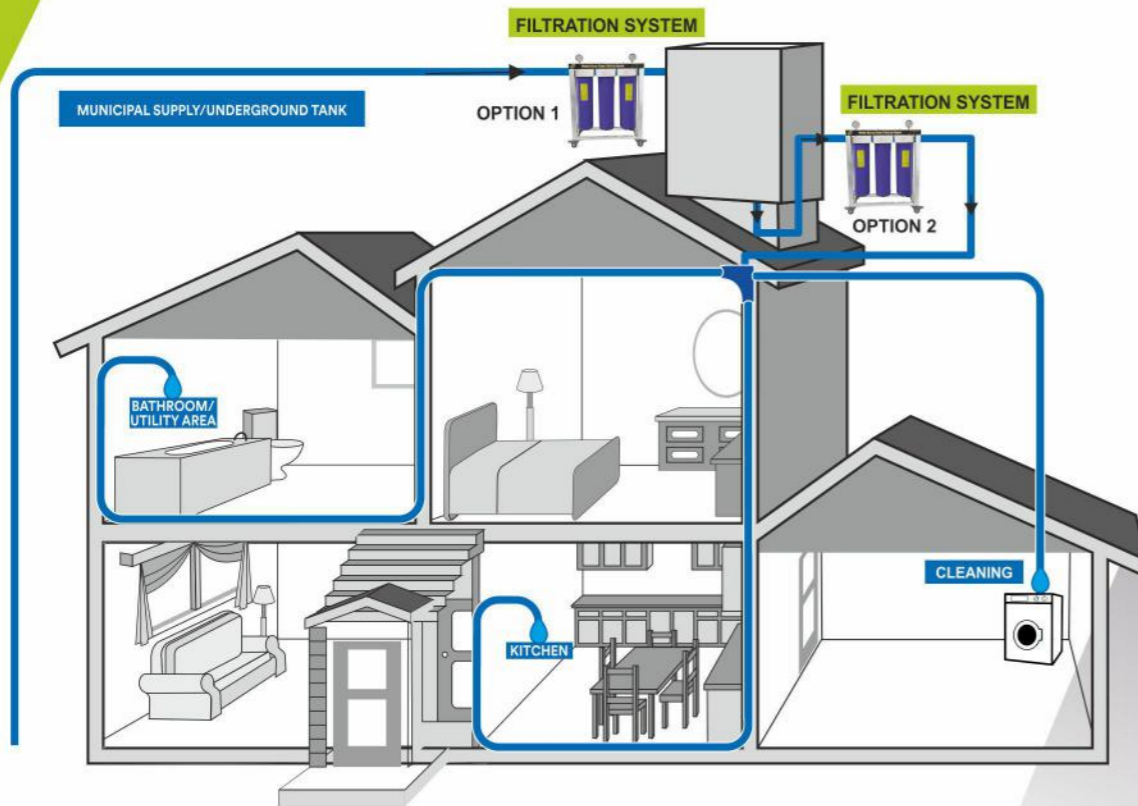

Dry Skin Health Issues Hair Falling Limescale on Tap

RETHINK ABOUT YOUR WATER

If your water is impure...

we offer wide range of Hi-Tech Water Filtration System are designed for your Home or Apartments. Its keep your family safe & Healthy from Water related harmful effects.

Features

- SS Stainless steel Skid
- High Strength & Durability
- Leak Proof
- No Electricity required
- Zero Water Wasted
- Flawless Finish
- Analysis of an Applied Force
- Low Cost Maintenance
- Non Rust & Corrode in Body
- impurities & harmful entities Free Water

Filtration Stages & Technologies Works

Stage 1 : Strainer Filter

Removes dirt, sand, silt from water

Stage 2 : Sediment Filter (only for WHF 20-3 & WHF 10-3 Models)

Removes impurities, Rust, deposits, particles, sand etc. upto 5 micron

Stage 3 : GAC

Removes certain chemicals, impurities, mainly organic chemicals

Pressure Gauge

It's dial-type mechanical instruments designed to measure pressure of inlet & outlet water, Featuring weather and corrosion resistant stainless steel case and internals.
